

Subject Index to Volume 25

A

- Acarbose, treatment, sleep patterns in genetic obesity, R281
- Acid-base balance, glucocorticoids and, renal brush-border membrane (chick), R1176
- Acidosis, recovery and, muscle energy metabolism (fish), R922
- ACTH: *see* Adrenocorticotropin
- Adenosine monophosphate, cyclic, calcitonin gene-related peptide increase in, atria, R421
- Adenosine triphosphatase activity, carbohydrate effects on cardiac myosin isoenzyme, R976
- calcium-stimulated activity, gill (eel), R313
- oxygen consumption, regulation in red muscle, R898
- Adipocytes, dynamics, cyclic weight gain and loss (squirrel), R1286
- Adipose tissue brown: *see* Brown fat
- dynamics, cyclic weight gain and loss (squirrel), R1286
- Adrenalectomy ANF receptors in, glomerular and vascular, R1250
- response to cortisone and MSH and, genetic obesity, R494
- Adrenal gland, catecholamines, exercise and, R155
- Adrenal medulla function, exercise and emotional stress, R169
- glucose, FFA, and insulin levels, exercise and, R161
- Adrenocorticotropin after hemorrhage, awake state (swine), R915
- blood volume restitution and, after hemorrhage (swine), R207
- control of secretion, vasopressin and angiotensin II, R339
- hypertension induced by, R1308
- reflex responses to hypotension, sinoaortic denervation and, fetus (sheep), R1103
- response, bradycardia and, paraventricular stimulation and, R112
- Adrenomedullation, exercise and, R155
- Aging exercise training and cold exposure effects, regional blood flow, R1069
- osmoregulation and, neural correlates and (mollusc), R989
- Aldosterone escape, proximal tubule response in, R86
- plasma, dietary sodium intake and, R1171
- plasma atriopeptin and, during exercise, R1098
- secretion, angiotensin II-stimulated, ANP inhibition of, R1155
- Althesin, urethan-chloralose and, neurohumoral cardiovascular regulation, R757
- Amiloride cyclic sodium and potassium excretion and, R510
- saccharide-activated pathway and, lingual epithelium, R394
- sodium permeation and, cold sensitivity in red cells (guinea pig, squirrel), R49
- γ -Aminobutyric acid increased shunt activity, ventromedial nucleus, hyperphagic models, R1225
- trigeminal depressor response, medial medulla role in, R1111
- Aminophylline, metabolic effects, R1274
- Aminotransferase, liver treated with, glucocarcinogenesis in (chicken), R907
- Anesthesia althesin and urethan-chloralose effects, neurohumoral cardiovascular regulation, R757
- blood pressure response, cyclic blood volume changes, R827
- cardiovascular responses, intrathecal vasopressin, R193
- ANF: *see* Atrial natriuretic factor
- Angiotensin, drinking induced by, brainstem mechanisms in, R264
- Angiotensin II arterial pressure and, after chronic spinal transection, awake state, R666
- blood pressure levels and, R70
- central effects, baroreflex control, awake state, R694
- placental blood flow and, fetus (sheep), R1056
- pressor response to, systemic vascular autoregulation, R98
- vasopressin and, control of ACTH secretion, R339
- Anorexia CCK effects food intake, R646
- serotonergic function and, R1138
- Anorexigenic treatments, gastric motility and, R955
- Anoxia ambient, water temperature selection and (goldfish), R133
- recovery and, muscle energy metabolism (fish), R922
- ANP: *see* Atrial natriuretic peptide
- Antidiuretic hormone: *see also* Vasopressin blood glucose concentration effects, diabetes, R597
- Antipyresis, indomethacin-induced, V_1 receptor effects, R1164
- Apnea intracardiac shunt relations (turtle), R240
- transcendental meditation and, R632
- Appetite, regulation, bombesin effects, R181
- Area postrema lesions, force feeding after, R939
- overingestion, parabrachial lesions and, R306
- Arousal state, vs. temperature effects, neuronal activity in subcoeruleus area, R840
- Asphyxia cardiovascular responses, endogenous opioids in, fetus (sheep), R1063
- fast sympathetic rhythms in, R120
- ATPase: *see* Adenosine triphosphatase
- Atrial natriuretic factor after hemorrhage, awake state (swine), R915
- aldosterone escape, proximal tubular response, R86
- glomerular and vascular, adrenalectomy and, R1250
- isolated arteries and perfused organs (fish), R10
- microinjected, solitary nucleus, R577
- natriuresis induced by, during pacing tachycardia, R1245
- renin inhibition, sympathetic nerve role in, R413
- type C receptors, clearance function, R469
- Atrial natriuretic peptide brain, renal nerve activity and, awake state, R792
- calcitonin gene-related peptide and, regional hemodynamic effects, R332
- inhibition, angiotensin II-stimulated aldosterone secretion and, R1155
- plasma, dietary sodium intake and, R1171
- renal response to volume expansion and, awake state, R284
- sodium excretion and, during acute hypertension, awake state, R1044
- Atriopeptin, plasma, during exercise, β -blockade and, R1098
- Atropine fentanyl and, carotid sinus baroreflex control of circulation, R625
- modulation, blood pressure and heart rate, R1127
- Autonomic nervous system, intrinsic heart rate, neurogenic mechanism control of, R231
- Autoregulation, systemic vascular, pressor response to vasoconstrictor agents, R98
- Awake state atrial peptide release, after hemorrhage (swine), R915
- baroreflex regulation, central effect of angiotensin II, R694
- blood pressure response, cyclic blood volume changes, R827
- cardiovascular responses, intrathecal vasopressin, R193
- fentanyl effects, carotid sinus reflex and circulation, R625
- glomerular filtration rate, dehydration and (bird), R836
- hypovolemia, regional hemodynamic changes following, R1076
- left ventricular pressure, inhibition of plasma renin activity by, R1299
- plasma vasopressin and oxytocin, afferent renal nerve effects, R1240

Awake state (*continued*)

- renal nerve activity, brain neuropeptide infusion and, R792
- sympathetic outflow increase, paraventricular nucleus stimulation, R1325
- urinary excretion, vasopressin, R291
- volume expansion, renal response to, ANP effects, R284
- water immersion, sympathetic nerve activity and natriuresis during, R299

B

Bacteremia

- calcium uptake and, skeletal muscle, R201
- sugar transport in, diltiazem effects, skeletal muscle, R716

Basolateral membrane, renal, sulfate transport, glucocorticoid inhibition of (chick), R1176

Behavior

- characterization of, alerting stimuli, R1121
- feeding, caloric regulation, R518
- ingestive, bombesin injections into fourth ventricle and, R590
- water temperature selection, ethanol and anoxia effects (goldfish), R133
- Benzodiazepine, circadian rhythms and (hamster), R639

Blockade

- β -adrenergic
 - overfeeding-induced thermogenesis and, R653
 - plasma atriopeptin during exercise, R1098
- sympathetic, diurnal variation of hemodynamics and (monkey), R778

Blood

- constituents: *see* specific constituent
- volume: *see* Volume
- whole, glucose levels, hematocrit effects (seal), R1220

Blood-brain barrier

- adrenoceptors, pericytes and microvessels, R224
- disruption, mannitol and, R443
- prostaglandin formation, fever effects, hypothalamus, R616

Blood flow: *see also* Circulation

- althesin and urethan-chloralose effects, neurohumoral cardiovascular regulation, R757
- calcitonin gene-related peptide and, R332

cerebral

- immature fetus (sheep), R1264
- maturational changes, R78
- regional, exercise training and cold exposure, R1069
- renal, ANF and, during pacing tachycardia, R1245

Blood pressure: *see also* Pressure

- diabetes mellitus and, R1279
- dietary obesity, weight cycling effects and, R1209
- DOCA-salt hypertension, vasopressin actions in, R138
- dynorphin and vasopressin effects, fetus (lamb), R1318
- flow dynamics, heart (crocodile), R875
- glutamate antagonist and, R722
- levels, perinatal sodium chloride exposure, R70
- low-sodium diet, CEI effects, R523

- prostaglandin E_2 infusion, comparison of methods, awake state (sheep), R685
- reflex responses to hypotension, sinoaortic denervation and, fetus (sheep), R1103
- regulation, ANF and (fish), R10
- response, cyclic blood volume changes, awake and asleep, R827
- ultradian, autonomic modulation of, R1127
- urinary excretion of vasopressin and, awake state, R291

Blood volume: *see also* Volume

- after hemorrhage, behavioral and hormonal effects on (swine), R207
- cyclic changes, blood pressure response to, awake and asleep, R827
- long-term hypoxemia, maternal responses to (sheep), R1340
- regulation, left ventricular pressure and, awake state, R1299
- restoration, after slow hemorrhage, fetus (sheep), R1040

Body

- composition
 - cyclic weight gain and loss (squirrel), R1286
 - energy balance, exercise-rest cycle effects, R886
 - prolactin and (hamster), R174
- fluids, DOCA-salt hypertension, vasopressin in, R138
- size, muscle mechanics and locomotor performance (salamander), R1200
- weight: *see* Weight

Bombesin

- CCK-8-induced satiety and, R56
- food intake, gastric acid secretion and, R181
- regulation of food intake and, R646

Bone, growth, rapid, changes in lumbar vertebrae, R259

Bradycardia

- cardiovascular response to, vasopressin mediation of, fetus (sheep), R1011
- paraventricular stimulation of, R112

Brain

- hexokinase activity, during dehydration and rehydration, R1050
- natriuretic peptide, renal nerve activity and, awake state, R792
- oxygenation, maturational changes, R78
- physiology, immature fetus (sheep), R1264

Brain stem

- bombesin injection, ingestive behaviors and, R590
- mechanisms, thirst and, R264

Breathing: *see* Respiration

Brown fat

- adrenalectomy, genetic obesity and, R494
- energy balance, exercise-rest cycles and, R886
- energy expenditure, stress ulcer formation, R403
- photoperiod-induced changes, hyperprolactinemia effects (hamster), R174
- prolactin, stimulation of food intake, R276, R701
- rare fatty acids in, thermogenesis during arousal from hibernation (hamster), R146
- regional blood flow, aging and exercise effects, R1069

- thermogenesis, hibernation and arousal (ground squirrel), R42

Brush-border membranes, renal, sulfate transport, glucocorticoid inhibition of (chick), R1176

Bumetanide, sodium permeation and, cold sensitivity in *r-d* cells (guinea pig, squirrel), R49

C

Cachectin, IL-1 α and, cachexia induced by, redistribution of body proteins, R659Cachexia, cachectin or IL-1 α induced, redistribution of body proteins, R659

Calcitonin gene-related peptide

- cAMP, tension, and rate and, atria, R421
- regional hemodynamic effects, R332

Calcium

- ATPase activity stimulated by, gill (eel), R313
- regulation, sugar transport, skeletal muscle, R716
- uptake, bacteremia and, skeletal muscle, R201

Calcium ionophore, phosphate transport and, proximal tubules (fish), R850

Calories, density, short-term feeding, R518

Capillaries, density, thermal acclimation and, skeletal muscle (fish), R1

Capsaicin

- anorexigenic treatments, gastric motility and, R955
- lipoprivic feeding and, R1232

Carbachol, thirst and, brain stem mechanism, R264

Carbohydrates

- dietary, myosin isoenzyme profiles and, semistarvation, R976
- metabolism, immature fetus (sheep), R1264

Carbon dioxide

- production, ambient temperature effects, lean and obese rats, R236
- upper airway, respiration and (snake), R91

Cardiac output

- diurnal variations, sympathetic blockade effects (monkey), R778
- long-term hypoxemia, maternal responses to (sheep), R1340
- redistribution, vasopressin and, fetus (sheep), R1011

Cardioaccelerator, tension, rate, and cAMP, calcitonin gene-related peptide effects, R421

Cardiovascular responses, characterization of, alerting stimuli, R1121

Cardiovascular system, beat-to-beat regulation, left ventricular function, R962

Carotid sinus, baroreflex: *see* Reflexes

Catecholamines

- adrenal and sympathetic, exercise and, R155
- after hemorrhage, awake state (swine), R915
- blood volume restitution and, after hemorrhage (swine), R207
- central, after preoptic recess lesions, R487
- exercise-induced changes, R169
- neural control, exercise metabolism, R1019

- CCK-8: *see* Cholecystokinin octapeptide
 CEI: *see* Converting enzyme inhibition
 Central nervous system
 acidic fibroblast growth, feeding regulation and, R217
 angiotensin II effects, baroreflex regulation, awake state, R694
 neural modulation, renin release mechanism, R554
 Cerebral ventricles
 anteroventral third, preoptic recess lesions, hypertension and catecholamines after, R487
 fourth, bombesin injection, feeding behavior and, R590
 Cerebrospinal fluid
 hyperinsulinemia, central II-1 elicited, R772
 potassium transport and, choroid plexus, infant, R786
 pro-opiomelanocortin products, post-translational processing (piglet), R429
 Chloralose, renal sympathetic nerve activity and, awake state, R371
 Chloride
 concentration, hemolymph osmolality and (mollusc), R989
 excretion, ANF and, during pacing tachycardia, R1245
 Cholecystokinin
 anorexia induced by, serotonergic function and, R1138
 anorexigenic treatments, gastric motility and, R955
 hormone release induced by, anterior and posterior pituitary (sheep), R1355
 hypothalamic, release, nutrient and volume loading effects, R248
 intraventricular, food and intake and gastric emptying with (baboon), R1313
 lithium chloride and, inhibition of gastric emptying, R463
 physiological role for, food intake and, R646
 plasma levels, satiety and, R1148
 Cholecystokinin octapeptide, satiety induced by, gastric mediation of, R56
 Choroid plexus, potassium transport, infant, R786
 Chromatography, high-performance liquid, retinyl esters in neuroretina (frog), R255
 Circadian system, bright morning light effects, NREM sleep homeostasis, R106
 Circulation: *see also* Blood flow
 carotid sinus baroreflex control of, fen-tanyl and, R625
 coronary, somatic afferent fiber stimulation effects, R1331
 flow dynamics, heart (crocodile), R875
 head, gravity effects (giraffe), R567
 neural control of, prostaglandin E₂ infusion, awake state (sheep), R685
 umbilical, vasomotor responses, fetus (sheep), R1056
 Clearance
 metabolic, ANF type C receptors, R469
 vasopressin, awake state, R291
 Cold
 acclimation
 chronic glucagon-treated hyperthermia (duckling), R1192
 uncoupling protein in brown fat (squirrel), R42
 caloric regulation and, short-term feeding, R518
 Contenance, ganglionic filtering, efferent pelvic nerve activity and, R1269
 Converting enzyme inhibition, chronic, low-sodium diet effects and, R523, R531
 Coronary flow, autoregulation, hypothermic hearts (rat, squirrel), R357
 Corticosterone
 hypothalamic obesity and, R751
 ventromedial hypothalamus, response to exercise, R1019
 Corticotropin-releasing factor, intraventricular infusion, VMH-lesioned obesity and, R751
 Cortisol
 after hemorrhage, awake state (swine), R915
 blood volume restitution and, after hemorrhage (swine), R207
 control of secretion, vasopressin and angiotensin II, R339
 reflex responses to hypotension, sinoaortic denervation and, fetus (sheep), R1103
 release, CCK-induced (sheep), R1355
 stimulation of sodium-potassium-ATPase activity, ouabain binding and, gill (salmon), R707
 Cortisone, adrenalectomy and, genetic obesity, R494
 Creatine kinase, activity, chronic glucagon-treated hyperthermia (duckling), R1192
 CRF: *see* Corticotropin-releasing factor
 Cushing reaction, fast sympathetic rhythms in, R120
 Cytochrome oxidase
 activity, chronic glucagon-treated hyperthermia (duckling), R1192
 mitochondrial activity, cell composition and, R63
 Cytochrome-c oxidase, maturational changes, brain, R78
 Cytokines, cachexia and, redistribution of body proteins, R659
- D**
- Deconvolution, constrained, models, R1005
 Dehydration
 anorexigenic treatments, gastric motility and, R955
 glomerular filtration rate, awake and unrestrained (bird), R836
 hexokinase activity during, brain, R1050
 rehydration and, homeostatic response (cattle), R816
 systemic fluid homeostasis, rumen volume saliva flow rate and (cattle), R809
 Denervation, cardiovascular response to (toad), R946
 2-Deoxy-D-glucose, lipoprivic and glucoprivic feeding, R1232
 Development: *see also* Growth; Maturation
 pro-opiomelanocortin products, post-translational processing (piglet), R429
 Dexamethasone
 inhibition of sulfate transport, renal brush-border membrane (chick), R1176
 liver treated with, gluconeogenesis in (chicken), R907
 Dextrofenfluramine, anorexia induced by, serotonergic function and, R1138
 Diabetes, streptozotocin, increased γ -aminobutyric shunt activity and, R1225
 Diabetes insipidus, DOCA-salt hypertension, vasopressin actions in, R138
 Diabetes mellitus
 cardiovascular, fluid, and electrolyte status, R1279
 osmoregulation in, blood glucose concentration effects, R597
 Diacylglycerol, phosphate transport and, proximal tubules (fish), R850
 Diencephalic tissue, neuronal thermosensitivity, normotension and hypertension, R560
 Diet: *see* Feeding
 3,4-Dihydroxybutanoic acid γ -lactone, endogenous, stereospecific feeding by, R366
 Diltiazem
 bacteremia and calcium uptake, skeletal muscle, R201
 sugar transport and, skeletal muscle, R716
 Diuresis
 ANF-induced, during pacing tachycardia, R1245
 atrial peptides, renal function and, awake state, R284
 sympathetic nerve activity and, water immersion, awake state, R299
 Diuretics, cyclic sodium and potassium excretion and, R510
 Drinking
 angiotensin-induced, brain-stem mechanisms in, R264
 blood glucose concentration effects, diabetes, R597
 thirst, osmoregulation during estrous cycle (pig), R270
 Dynorphin, cardiovascular effects, fetus (lamb), R1318
- E**
- Ectothermy, cell composition and, R63
 Edema, cerebral, sex differences, R880
 Efferent nerve, pelvic, activity, bladder, R1269
 Eicosadienoic acid, brown fat, thermogenesis during arousal from hibernation (hamster), R146
 Eicosatrienoic acid, brown fat, thermogenesis during arousal from hibernation (hamster), R146
 Electrolytes
 excretion, renal response, ANP effects, awake state, R284
 fluid and, balance, ANP effects, R1155
 homeostasis, amiloride effects, R510
 plasma atriopeptin and, during exercise, R1098
 status, diabetes mellitus, R1279
 Enalapril, chronic, low-sodium diet effects and, R523
 β -Endorphin
 posttranslational processing (piglet), R429
 release, control by carotid baroreflex, R408
 Endothelial cells, binding sites for endothelin, autoradiographic distribution in tissues, R858

- Endothelin, binding sites for, autoradiographic distribution in tissues, R858
- Endothermy, cell composition and, R63
- Endotoxin, prostaglandin formation and, hypothalamus, R616
- Energy
balance
 exercise-rest cycles and, R886
 prolactin stimulates food intake, R276
conservation, sleep changes during fasting (penguin), R476
expenditure
 single-sample doubly-labeled water method, R572
 stress ulcer formation, R403
metabolism, muscle, anoxia and recovery (fish), R922
- Enteric nerves, neuromodulation, intestinal transport, suckling, R481
- Epinephrine
adrenal and sympathetic, exercise and, R155
 exercise-induced changes, R169
 long-term hypoxemia, fetal responses to (sheep), R1340
 physiological responses to, underfeeding effects, lean women, R583
- Erythrocytes
cooling effects, sodium permeation and (guinea pig, squirrel), R49
glucose levels, hematocrit effects (seal), R1220
- Erythropoietin
long-term hypoxemia
 fetal responses to (sheep), R1340
 maternal responses to (sheep), R1340
- Estrogen, ovarian, absence of, prolactin stimulation of food intake, R701
- Estrous cycle, vasopressin secretion and thirst during, osmoregulation of (pig), R270
- Ethanol, intracranial, water temperature selection and (goldfish), R133
- Exercise
catecholamines, sympathoadrenal, R155
changes induced by, catecholamines, glucose, and FFA, R169
endurance, muscle mechanics and locomotor performance (salamander), R1260
glucose, FFA, and insulin levels, sympathoadrenal influences on, R161
hormonal and metabolic responses to, ventromedial hypothalamic regulation of, R1019
muscle contraction, posterior hypothalamic neurons stimulation, R348
plasma atriopeptin during, β -blockade and, R1098
rest cycles, energy balance and, R886
training, cold exposure and, regional blood flow, R1069

F

- Fasting
glucose turnover and (fish), R612
sleep changes during (penguin), R476
- Fatty acids
brown fat, thermogenesis during arousal from hibernation (hamster), R146
free
 exercise-induced changes, R169
 fasting effects (fish), R612

- sympathoadrenal influences on, exercise, R161
uncoupling effect of (duckling), R1192
- membrane, cell composition and, R63
- Feeding
anorexigemic treatments, gastric motility and, R955
bombesin effects, brain stem, R590
brown fat, prolactin and (hamster), R174
CCK-8-induced satiety, gastric mediation of, R56
CCK role in, R646
dietary obesity, weight cycling and, R1209
dietary restrictions, increased γ -aminobutyric shunt activity and, R1225
dietary sodium intake, changes in, hormonal responses to, R1171
energy balance, exercise-rest cycles and, R886
fasting and, glucose turnover (fish), R612
food deprivation
 macronutrient intake, nocturnal pattern, R541
 regulation by nocturnal hypothermia (pigeon), R733
force, area postrema following, R939
free, macronutrient intake, nocturnal pattern, R541
gastric acid secretion and, bombesin effects, R181
gastric emptying and
 CCK and lithium chloride effects, R463
 intraventricular CCK inhibition (baboon), R1313
histamine modulation of, hypothalamus, R605
hypothalamic obesity, CRF and, R751
ingestion, taste effects on, postabsorptive glucose and, R1142
lipoprivic, capsaicin effects, R1232
low-sodium diet, chronic converting enzyme inhibition effects, R523, R531
parabrachial lesions, area postrema over-ingestion and, R306
prolactin stimulation of, absence of ovarian progesterone, R701
regulation, central action of acidic fibroblast growth, R217
restriction, carbohydrate effects on cardiac myosin isoenzyme, R976
satiety and, plasma CCK level effects, R1148
serotonergic function, CCK-induced anorexia and, R1138
short-term, caloric regulation during, R518
stereospecific, endogenous organic acid, R366
stimulation of food intake, prolactin and, R276
underfeeding, responses to epinephrine and, lean women, R583
- Fentanyl, carotid sinus baroreflex control and, circulation, R625
- Fetus: see also Lactation; Pregnancy
cardiovascular response to asphyxia
endogenous opioids and (sheep), R1063
vasopressin mediation of (sheep), R1011
dynorphin and vasopressin, cardiovascular effects of (lamb), R1318

- immature, cerebral blood flow, oxygenation, and carbohydrate secretion (sheep), R1264
- isoproterenol-stimulated renin secretion, renal cortex (sheep), R1258
responses to long-term hypoxemia (sheep), R1348
- slow hemorrhage, blood volume restoration after (sheep), R1040
- Fever
acute-phase response and, induced by interleukin 1 and tumor necrosis factor, R35
hyperinsulinemia, central IL-1 elicited, R772
indomethacin-induced, V_1 receptor effects, R1164
prostaglandin formation and, hypothalamus, R616
- FFA: see Fatty acids, free
- Fibroblasts, acidic growth, central action in feeding regulation, R217
- Filtration
glomerular
 dehydration, awake and unrestrained (bird), R836
 low-sodium diet and chronic CEI effects, R523
- Flow, viscous, gravity effects on circulation to head (giraffe), R567
- Fluid
cerebrospinal: see Cerebrospinal fluid
systemic homeostatic
 dehydration and (cattle), R809
 rehydration and (cattle), R816
 α -Fluoromethylhistidine, modulation of feeding behavior, hypothalamus, R605
- Forebrain, hexokinase activity, renal denervation effects, neurogenic hypertension, R930
- Forskolin, phosphate transport and, proximal tubules (fish), R850
- Fructose, saccharide-activated pathway and, lingual epithelium, R394

G

- Ganglion, filtering, efferent pelvic nerve activity and, bladder, R1269
- Gastric acid, secretion, bombesin effects, R181
- Gastric distension, hypothalamic CCK and, R248
- Gastric emptying
bombesin effects, R181
CCK-8-induced satiety, R56
feeding and, intraventricular CCK inhibition (baboon), R1313
inhibition, CCK and lithium chloride, R463
- Gastrin, CCK-8-induced satiety and, R56
- Gill, vessels, ANF effects (fish), R10
- Glucagon
hyperinsulinemia, central IL-1 elicited, R772
treatment, chronic, hyperthermia (duckling), R1192
ventromedial hypothalamus, response to exercise, R1019
- Glucocorticoids
control of secretion, vasopressin and angiotensin II, R339

- inhibition of sulfate transport, renal brush-border membrane (chick), R1176
- liver treated with, gluconeogenesis in (chicken), R907
- Gluconeogenesis, liver, dexamethasone-treated (chicken), R907
- Glucose
- blood
 - homeostasis, exercise metabolism, R1019
 - osmoregulation and, diabetes mellitus, R597
 - exercise-induced changes, R169
 - level, whole blood, hematocrit effects (seal), R1220
 - metabolism
 - cerebral physiology and, immature fetus (sheep), R1264
 - increased γ -aminobutyric shunt activity and, R1225
 - obesity, obesity resistance and, R766
 - postabsorptive, taste effects on ingestion, R1142
 - stereospecific feeding, endogenous organic acid, R366
 - sympathoadrenal influences on, exercise and, R161
 - turnover, fasting effects (fish), R612
- D-Glucose, saccharide-activated pathway and, lingual epithelium, R394
- L-Glutamate, paraventricular stimulation of, bradycardia and pituitary responses, R112
- Glutamate antagonist, sympathetic activity in presence of, R722
- Gravity, circulation and, head (giraffe), R567
- Growth: *see also* Development; Maturation rapid, changes in lumbar vertebrae, R259
- Guanosine diphosphate, binding, brown fat (squirrel), R42
- Gustatory response
 - conditioned aversion, bombesin injection into fourth ventricle and, R590
 - ingestion and, postabsorptive glucose effects, R1142

H

- Heart
- direct stimulation, arginine vasotocin (bullfrog), R187
 - flow dynamics (crocodile), R875
 - hypothermic, coronary autoregulation and metabolism (rat, squirrel), R357
 - mechanics, beat-to-beat regulation, R962
 - regeneration, adult mammalian, R797
- Heart atria, tension, rate, and cAMP, calcitonin gene-related peptide effects, R421
- Heart rate
 - blood pressure and, perinatal sodium chloride exposure, R70
 - brain neuropeptide infusion and, awake state, R792
 - central effects of angiotensin II, baroreflex control, awake state, R694
 - dietary obesity, weight cycling effects and, R1209
 - dynorphin and vasopressin effects, fetus (lamb), R1318
 - intrinsic, neurogenic mechanism control of, R231
 - oscillations, autonomic modulation of, R1127
- prostaglandin E₂ infusion, comparison of methods, awake state (sheep), R685
- reflex responses to hypotension, sinoaortic denervation and, fetus (sheep), R1103
- response to ANF microinjection, R577
- urinary excretion of vasopressin and, awake state, R291
- vasopressin and angiotensin II control of, R339
- Heart ventricles, left, function, beat-to-beat regulation, R962
- Hematocrit, glucose levels and, whole blood (seal), R1220
- Hemoglobin, concentration, muscle (lizard), R982
- Hemorrhage
 - atrial peptide release after, awake state (swine), R915
 - blood volume restitution, behavioral and hormonal effects (swine), R207
 - slow, blood volume restoration after, fetus (sheep), R1040
- Hexokinase
 - activity, regional alterations, dehydration and rehydration effects, brain, R1050
 - forebrain activity, renal denervation effects, neurogenic hypertension, R930
- Hibernation
 - adipose tissue dynamics, cyclic weight gain and loss (squirrel), R1286
 - arousal from, thermogenesis during, fatty acid effects (hamster), R146
 - brown fat thermogenesis during, uncoupling protein (squirrel), R42
- Hibernator cells, cooling effects, sodium permeation (guinea pig), R49
- Hindbrain, parabrachial lesions, area postrema overingestion and, R306
- Histamine, modulation of feeding behavior, hypothalamus, R605
- Homo- γ -linoleic acid, brown fat, thermogenesis during arousal from hibernation (hamster), R146
- Hormonal responses
 - dietary sodium intake changes, R1171
 - exercise, ventromedial hypothalamic regulation of, R1019
- Hyperinsulinemia, central II-1 elicited, R772
- Hyperprolactinemia, photoperiod-induced changes and, brown fat (hamster), R174
- Hypertension
 - ACTH-induced, R1308
 - ANP and natriuresis during, awake state, R1044
 - cardiovascular response to, vasopressin mediation of, fetus (sheep), R1011
 - central catecholamines and, preoptic recess lesions, R487
 - coarctation, low-sodium diet, CEI effects, R523
 - DOCA-salt, age-dependent, vasopressin in, R138
 - neurogenic, forebrain hexokinase activity, renal denervation in, R930
 - pressor response, vasoconstrictor agents, R98
 - renal, neurogenic mechanism control of heart rate, R231
 - spontaneous
 - neuronal thermosensitivity in, R560
 - weight cycling and dietary obesity effects, R1209
- Hypothermia, chronic glucagon-treated, loose-coupled mitochondria in (duckling), R1192
- Hyponatremia, increased morbidity, females, sex differences, R880
- Hypoproteinemia, thoracic duct lymph and (sheep), R867
- Hypotension, reflex responses to, sinoaortic denervation attenuation of, fetus (sheep), R1103
- Hypothalamic nucleus, anterior, preoptic recess lesions, hypertension and catecholamines after, R487
- Hypothalamus
 - CCK, release, nutrient and volume loading effects, R248
 - H₁-receptor in, histamine modulation of feeding behavior, R605
 - hyperinsulinemia, central II-1 elicited, R772
 - lateral area, fibroblast growth in feeding regulation, R217
 - neuronal thermosensitivity, normotension and hypertension, R560
 - paraventricular nucleus, sympathetic outflow and, R1325
 - posterior neurons, muscle contraction effects, R348
 - prostaglandin formation, fever and, R616
 - temperature, response of thalamic neurons, R1293
 - vasopressin and oxytocin release, afferent renal nerve effects, R1240
 - ventromedial, regulation of responses to exercise, R1019
- Hypothermia
 - heart, coronary autoregulation and metabolism (rat, squirrel), R357
 - nocturnal, regulated by food deprivation (pigeon), R733
 - sodium permeation and, red cells (guinea pig, ground squirrel), R49
- Hypoventilation, transcendental meditation and, R632
- Hypovolemia, regional hemodynamic changes following, awake state, R1076
- Hypoxemia
 - cardiovascular response to, vasopressin mediation of, fetus (sheep), R1011
 - long-term
 - fetal responses to (sheep), R1348
 - maternal responses to (sheep), R1340
- Hypoxia
 - fast sympathetic rhythms, cerebral ischemia, R120
 - long-term, fetal responses to (sheep), R1348

I

- IL-1: *see* Interleukin 1
- Immersion, sympathetic nerve activity and natriuresis during, awake state, R299
- Infant: *see also* Newborn
- choroid plexus, potassium transport in, R786
- Ingestion: *see* Feeding
- Insulin
 - exercise-induced changes, R169
 - hyperinsulinemia, central II-1 elicited, R772

- Insulin** (*continued*)
 levels, sympathoadrenal influences on, exercise, R161
 obesity, obesity resistance and, R766
 sleep disturbances and, genetic obesity, R281
 stereospecific feeding, endogenous organic acid, R366
 stress immobilization, genetic obesity, 435
 ventromedial hypothalamus, response to exercise, R1019
- Interleukin 1**
 central administration, hyperinsulinemia and, R772
 prostaglandin formation and, hypothalamus, R616
 tumor necrosis factor and, fever and acute-phase response induced by, R35
- Interleukin 1 α** , cachectin and, cachexia induced by, redistribution of body proteins, R659
- Intermolecular forces**, osmosis, R801
- Intestine**, transport, neuromodulation of, suckling, R481
- Iodocyanopindolol**, binding, adrenoceptors in pericytes and microvessels, R224
- Ions**, transport, salt gland (duck), R1184
- Ischemia**, cerebral, fast sympathetic rhythms in, R120
- Isoproterenol**
 blood pressure levels and, R70
 placental blood flow and, fetus (sheep), R1056
 renin secretion stimulated by, renal cortex (sheep), R1258
- Isotope**, stable, single-sample doubly-labeled water method, R572
- J**
- Jejunum**, transport, neuromodulation of, suckling, R481
- K**
- Ketogenesis**, physiological responses to norepinephrine, underfeeding effects, lean women, R583
- Kidney**
 denervation, forebrain hexokinase activity and, neurogenic hypertension, R930
 function, dehydration, awake and unrestrained (bird), R836
 response to volume expansion, ANP effects, R284
 sodium and potassium excretion, diurnal cyclic, amiloride effects, R510
 structure, concentrating ability and (bird), R501
- Kidney cortex**, renin secretion, isoproterenol-stimulated (sheep), R1258
- Kidney medulla**, structure, concentrating ability and (bird), R501
- Kidney tubules**
 proximal
 aldosterone escape and, R86
 control of phosphate transport (fish), R850
- Kynurenate**, sympathetic nerve discharge and, R722
- L**
- Lactate**, metabolism, cerebral physiology and, immature fetus (sheep), R1264

- Lactation**: *see also* Fetus; Pregnancy
 food intake, prolactin stimulation of, R276
 prolactin stimulation of feeding, absence of ovarian progesterone, R701
- Laryngeal nerve**, superior, swallowing reflex, R822
- Lateral reticular nucleus**, somatic pressor reflex, R448
- Light**, bright morning, sleep homeostasis and, R106
- Lingual epithelium**, saccharide-activated pathway, R394
- Lipolysis**, physiological responses to norepinephrine, underfeeding effects, lean women, R583
- β -Lipoprotein**, posttranslational processing (piglet), R429
- Lithium**, aldosterone escape, proximal tubular response, R86
- Lithium chloride**, CCK and, inhibition of gastric emptying, R463
- Liver**
 dexamethasone-treated, gluconeogenesis in (chicken), R907
 postabsorptive glucose, sensory control of food intake and, R1142
- Loading**, osmotic, vasopressin secretion and thirst during estrous cycle (pig), R270
- Locomotion**, muscle mechanics and (salamander), R1200
- Lymph**, drainage, cardiovascular function and thoracic duct lymph (sheep), R867

M

- Macronutrients**, intake, nocturnal patterns, R541
- Magnesium ions**, interactions, calcium-stimulated ATPase activity, gill (eel), R313
- Mannitol**, blood-brain barrier disruption, R443
- Maturation**: *see also* Development; Growth
 changes in oxygenation and blood flow with, cerebral, R78
- Medulla**, midline, trigeminal depressor response and, R1111
- Medulla oblongata**, solitary, response to ANF microinjection, R577
- Melanocyte-stimulating hormone**, adrenalectomy and, genetic obesity, R494
- Melatonin**
 bright morning light, sleep homeostasis and, R106
 rhythms, thermal sensitivity of (reptile), R1160
- Membrane**
 basolateral: *see* Basolateral membrane
 brachial plasma, calcium-stimulated ATPase activity, gill (eel), R313
- Mercaptoacetate**, lipoprivic and glucoprivic feeding, R1232
- Mesenteric nerves**, tonic influences of rostral medulla and, R323
- Metabolic rate**
 aminophylline, R1274
 resting, β -adrenergic blockade and, R653
 transcendental meditation and, R632
- Metabolic responses**, exercise, ventromedial hypothalamic regulation of, R1019
- Metergoline**, anorexia induced by, serotonergic function and, R1138

- Methotrexate**, mannitol and, blood-brain barrier disruption, R443
- 3-O-Methylglucose**, transport, diltiazem effects, skeletal muscle, R716
- Methylxanthine**, metabolic effects, R1274
- Metoprolol**, modulation, blood pressure and heart rate, R1127
- Microscopy**
 electron, blood-brain barrier disruption with mannitol, R443
 transmission electron, choroid plexus, infant, R786
- Microspheres**
 radiolabeled
 cerebral physiology, immature fetus (sheep), R1264
 intracardiac shunts (turtle), R240
- Microvessels**, adrenoceptors in, R224
- Models**
 bright morning light, sleep homeostasis and, R106
 hyperphagic, γ -aminobutyric acid activity in ventromedial nucleus, R1225
- Morphometry**, constituent urine fractions, shape and volume of, R19
- Motility**, gastric, anorexigenic treatments, R955
- Muscle**
 capillary and mitochondrial unit in (lizard), R982
 contraction, posterior hypothalamic neurons stimulation, R348
 energy metabolism, anoxia and recovery (fish), R922
 mechanics, locomotor performance and (salamander), R1200
 red, regulation of oxygen consumption, R898
- Muscle**, heart, tension, rate, and cAMP, calcitonin gene-related peptide effects, R421
- Muscle**, skeletal
 calcium uptake, bacteremia and, R201
 subcellular structure, thermal acclimation effects (fish), R1
 sugar transport, diltiazem effects, R716
- Myocardium**, tension, rate, and cAMP, calcitonin gene-related peptide effects, R421
- Myocytes**, regenerative capacity, adult mammalian, R797
- Myosin isoenzyme**, cardiac, dietary carbohydrate effects, semistarvation and, R976

N

- Naloxone**, cardiovascular response to asphyxia and, fetus (sheep), R1063
- Nasal system**, role in breathing, upper airway carbon dioxide and (snake), R91
- Natriuresis**
 ANF-induced, during pacing tachycardia, R1245
 ANF receptors, adrenalectomy and, R1250
 ANP and, during acute hypertension, awake state, R1044
 atrial peptides, renal function and, awake state, R284
 sympathetic nerve activity and, water immersion, awake state, R299
- Nausea**, feeding and gastric emptying, CCK and lithium chloride effects, R463

- Nerve, measurements, unitary spike trains, R997
- Neurogenic mechanisms, control of intrinsic heart rate, R231
- Neurohypophyseal hormone, direct cardiac stimulation (bullfrog), R187
- Neurohypophysis, vasopressin and oxytocin release, afferent renal nerve effects, R1240
- Neuromodulation, intestinal transport, suckling, R481
- Neuronal activity, subcoeruleus area, arousal state vs. temperature effects, R840
- Neurons

ulcer formation, energy expenditure, R403
- Subcoeruleus area, neuronal activity in, arousal state vs. temperature effects, R840
- Sugar, transport, diltiazem effects, skeletal muscle, R716
- Sulfate, regulation, glucocorticoids and, renal brush-border membrane (chick), R1176
- Suprachiasmatic nucleus, lesions, activity rhythms and, R1027
- Supraoptic nucleus, hexokinase activity, during dehydration and rehydration, R1050
- Swallowing, reflex, water and taste solutions and, R822
- Sympathetic nerve
activity
midline medulla, trigeminal depressor response, R1111
presence of glutamate antagonist, R722
renal, anesthetic effects in awake state, R371
spinal transection, cardiovascular regulation, awake state, R666
discharge, cerebral ischemia, R120
glucose, FFA, and insulin levels, exercise and, R161
- renal
activity and natriuresis, water immersion and, awake state, R299
activity, angiotensin II and, R694
paraventricular nucleus stimulation and, R1325
renin inhibition by left atrial pressure and, R413
tonic influences of rostral medulla and, R323
- Sympathetic nervous system
althesin and urethan-chloralose effects, neurohumoral cardiovascular regulation, R757
blockade, variation of hemodynamics and (monkey), R778
CRF infusion effects, VMH-lesioned obesity, R751
obesity, obesity resistance and, R766
physiological responses to norepinephrine, underfeeding effects, lean women, R583
weight cycling, dietary obesity and, R1209
- Sympathoadrenal activity, hemodynamics in hypovolemia, awake state, R1076
- T**
- Tachycardia
intrinsic heart rate, neurogenic mechanism control of, R231
pacing, ANF-induced natriuresis during, R1245
- Taste: see Gustatory response
- Temperature
ambient, respiratory quotient, lean and obese rats, R236
sodium permeation and, red cells (guinea pig, ground squirrel), R49
water, selection, ethanol and anoxia effects (goldfish), R133
- Temperature, body
hypothalamic, thalamic neuron response to, R1293
prostaglandin E₂ infusion, comparison of methods, awake state (sheep), R685
regulation, normotension and hypertension, R560
spinal, nocturnal hypothermia and food deprivation (pigeon), R733
vs. arousal state, neuronal activity in subcoeruleus area, R840
- Theophylline, spontaneous activity and, R1274
- Thermal acclimation, subcellular structure and, skeletal muscle (fish), R1
- Thermogenesis
brown fat, hibernation and arousal (ground squirrel), R42
cold-induced
aging, exercise and, effects on regional blood flow, R1069
respiratory quotient, lean and obese rats, R236
during arousal from hibernation, rare fatty acids in brown fat and (hamster), R146
energy balance, exercise-rest cycles and, R886
nonshivering, chronic glucagon-treated hyperthermia (duckling), R1192
obesity, obesity resistance and, R766
overfeeding-induced, chronic β -adrenergic blockade inhibition of, R653
physiological responses to norepinephrine, underfeeding effects, lean women, R583
- Thermoregulation
fever and acute-phase response, induced by IL-1 and TNF, R35
sensitivity, melatonin rhythms (reptile), R1160
temperature vs. arousal state effects, neuronal activity in subcoeruleus area, R840

- Thermoregulation (*continued*)
 thalamic neurons, skin cooling and, R1293
 water temperature selection, ethanol and anoxia effects (goldfish), R133
- Thermosensitivity
 neuronal, normotension and hypertension, R560
 nocturnal hypothermia, food deprivation and (pigeon), R733
- Thirst: *see* Drinking
- Thyroid hormone, semistarvation, carbohydrate effects on cardiac myosin isoenzyme, R976
- Thyroxine, overfeeding-induced thermogenesis, R653
- TNF: *see* Tumor necrosis factor
- Transcendental meditation, hypoventilation and, R632
- Triazolam, circadian rhythms and (hamster), R639
- Trigeminal depressor response, midline medulla role in, R1111
- Triiodothyronine, overfeeding-induced thermogenesis, R653
- Tryptophan, stress immobilization, genetic obesity, R435
- Tumor necrosis factor, interleukin 1 and, fever and acute-phase response induced by, R35

U

- Ulcer, stress, energy expenditure in formation, R403
- Ultrastructure, skeletal muscle, thermal acclimation and adaptive changes (fish), R1
- Umbilical artery, circulation: *see* Circulation
- Ureter
 peristaltic patterns, flow rate relations, R29
 transport, morphological dynamics, R19
- Urethan, renal sympathetic nerve activity and, awake state, R371
- Urethan-chloralose, althesin and, neurohumoral cardiovascular regulation, R757
- Urinary bladder, ganglionic filtering, efferent pelvic nerve activity and, R1269
- Urinary concentrating mechanism, kidney structure and (bird), R501
- Urinary excretion, vasopressin, awake state, R291
- Urine
 flow rate, peristaltic patterns, R29
 fractions, shape and volume of, R19
- Urodynamics
 constituent urine fractions, shape and volume of, R19

- urine flow rate, peristaltic patterns in, R29
- Urography
 constituent urine fractions, shape and volume of, R19
 peristaltic patterns, urine flow rate, R29

V

- Vagotomy, dynorphin and vasopressin effects, fetus (lamb), R1318
- Vagus nerve
 activity, brain neuropeptide infusion and, awake state, R792
 pulmonary afferent input patterns, respiratory I- β neurons, R379
- Vasoconstrictors
 arterial pressure and, after chronic spinal transection, awake state, R666
 binding sites for endothelin, autoradiographic distribution in tissues, R858
 pressor response to, systemic vascular autoregulation, R98
- Vasopressin: *see also* Antidiuretic hormone
 althesin and urethan-chloralose effects, neurohumoral cardiovascular regulation, R757
 angiotensin II and, control of ACTH secretion, R339
 arterial pressure and, after chronic spinal transection, awake state, R666
 blood volume restitution and, after hemorrhage (swine), R207
 cardiovascular effects, fetus (lamb), R1318
 cardiovascular response to hypoxemia and, fetus (sheep), R1011
 diabetes and, cardiovascular, fluid, and electrolyte status, R1279
 hemodynamics in hypovolemia, awake state, R1076
 hyponatremia, increased morbidity in females, R880
 infusion, sleep-waking cycle and, R674
 intrathecal, cardiovascular responses, asleep and awake, R193
 plasma, afferent renal nerve effects, awake state, R1240
 plasma atriopeptin and, during exercise, R1098
 pressor actions, age-dependent DOCA-salt hypertension, R138
 pressor response to, systemic vascular autoregulation, R98
 prostaglandin E₂ infusions and, comparison, awake state (sheep), R685
 release
 CCK-induced (sheep), R1355

- osmotic thresholds, R892
- secretion, osmoregulation of, estrous cycle and (pig), R270
- urinary excretion of, awake state, R291
- Vasotocin, arginine, direct cardiac stimulation by (bullfrog), R187
- Ventilation, intracardiac shunt relations (turtle), R240
- Ventral septum, indomethacin-induced fever, V₁ receptor effects, R1164
- Ventromedial hypothalamus, lesion, obesity and, CRF intraventricular infusion effects, R751
- Ventromedial nucleus, increased γ -aminobutyric shunt activity, hyperphagic models, R1225
- Vertebrae, lumbar, changes during rapid growth, R259
- Vertebral nerve, fast sympathetic rhythms, cerebral ischemia, R120
- VMH: *see* Ventromedial hypothalamus
- Volume: *see also* Blood volume
 plasma, restoration after slow hemorrhage, fetus (sheep), R1040
 thoracic duct lymph and (sheep), R867
- Vomeroneasal system, role in breathing, upper airway carbon dioxide and (snake), R91

W

- Water
 deprivation, hexokinase activity and, brain, R1050
 distribution, blood, glucose levels and (seal), R1220
 doubly labeled method, single-sample, validation, R572
 free, clearance, osmotic thresholds for vasopressin release, R892
 response to dehydration (cattle), R809
 temperature, selection, ethanol and anoxia effects (goldfish), R133
- Weanling, energy expenditure, stress ulcer formation, R403
- Weight
 body
 cyclic gain and loss, adipose tissue dynamics during (squirrel), R1286
 cycling, dietary obesity and, R1209
 following area postrema ablation, R939
 gain, adrenalectomy in genetic obesity, R494
 loss, CRF intraventricular infusion effects, R751
 uncoupling protein in brown fat (squirrel), R42
